Chairman Emeritus

QCFI Nagpur Chapter

Dear Members of the QCFI Fraternity,

The months of October, November, and December mark a period of reflection, recommitment, and renewed purpose for the quality movement across the nation. As we observe Quality Month, we are reminded that quality is not an event confined to a calendar, it is a discipline that must guide our actions every day.

Quality Month offers us an opportunity to pause and introspect. It urges organizations, institutions, and individuals to examine how deeply quality principles are embedded in their culture. Beyond certifications and audits, true quality is reflected in consistent processes, safe operations, customer trust, and pride in workmanship. When quality becomes a habit rather than an obligation, excellence follows naturally.

Adding great momentum to this spirit of excellence was the successful conduct of the National Convention on Quality Concepts (NCQC-25), was held in December 2025. The

convention once again demonstrated the power of participative management and collective learning. Teams from diverse sectors showcased innovative solutions, disciplined problem-solving, and remarkable improvements achieved through Quality Circles and continuous improvement practices.

NCQC-25 was not just a competition, it was a celebration of people. It highlighted how structured thinking, teamwork, and data-driven approaches can transform challenges into opportunities. The enthusiasm, creativity, and confidence displayed by participants reaffirmed our belief that quality initiatives are strongest when driven from the shop floor and sustained by leadership commitment.

As we move forward, let us carry the learnings of Quality Month and the inspiration of NCQC-25 into our daily work. Let us encourage our teams to question processes, eliminate waste, enhance safety, and continuously raise the bar of performance. Quality is the foundation upon which productivity, sustainability, and national competitiveness are built.

May this quarter strengthen our resolve to practice quality not only in our organizations, but also in our mindset and conduct. Together, let us continue contributing to a stronger, more efficient, and Atmanirbhar Bharat through the power of quality.

With warm regards and best wishes,

I had the privilege of attending the 39th National Convention on Quality Concepts (NCQC), Noida, as a jury member, nominated by the QCFI Nagpur Chapter. Despite reaching late on 19th December due to fog-related train delays, I could attend the QCFI Icons Awards, honouring stalwarts who dedicated decades of exemplary service to QCFI. Quality Month Celebrations

@ Ashok Leyland Bhandara Plant

Over the years, Team Ashok Leyland has consistently surpassed milestones in pursuit of higher quality standards, continuously raising the bar to meet and challenge global benchmarks.

This year, our Quality Month 2025 theme, "Future-Ready Quality, Today", aligns with the Global Theme "Quality: Think Differently". It emphasizes innovation, breaking traditional boundaries, and embracing advanced technologies to drive continuous improvement, resilience, and value creation beyond compliance. Quality is everyone's responsibility. It is the outcome of the perfect synergy between People, Processes, Machines, Materials, Methods, and Environment. When these elements work in harmony, World-class Quality emerges.

Quality Month 2025 commenced on November 3rd with the ceremonial unfurling of the Quality Flag, the administration of the Quality Pledge and team signatures reaffirming our commitment to excellence. The event was graced by addresses from the Plant Head – Bhandara, Head of Quality, Head of Manufacturing, and Head of HR, inspiring the enthusiastic audience.

Plant Head

Quality Head

Mfg Head

Rajendra Thakare, Plant Head, emphasized the critical importance of fostering quality in every aspect to achieve and sustain market leadership in a cost-effective way along with Premium Quality Products and services and ensuring Quality for future readiness.

Learning from the Past

Earlier during quality months, what we did was

- * Training people on **7 QC tools**
- * Forming more **Quality Circles**
- * Encouraging everyone to see how their work impacts quality

This surely Impacted on better teamwork, pride, and motivation among workers. The improvement focus was centered around Product Quality.

Now we must shift to Process Quality

- * Focus on **reducing variation**, the root of quality problems
- * Move from **product quality** to **process quality** — reliable, consistent steps

"Stable processes naturally produce quality output."

Making Quality Month Exciting

Activities suggested:

- * Theme: "**Reducing Variation through Data**"
- * Training on 7 QC tools and software like **Minitab, JMP, Excel**
- * MSMEs: Use **free Excel templates** or **AI tools** for charts and trend spotting

Competitions & Recognition:

- * Projects focusing on **reducing variation or recurring problems**
- * Presentations: **first week of December**
- * Reward participants to encourage ownership

"Even small improvements create pride and momentum!"

Practical Steps for MSMEs

- * Develop **one Excel/VBA expert** for automation
- * Ensure **100% process coverage with SOPs**
- * Critical/problem-prone steps: **Partial FMEA**
- * Review SOPs & start **adherence audits**

Partial FMEA Example (Tractor Assembly):

Process Step	Potential Failure	Possible Causes	Preventive Action
Tightening wheel nuts	Loose wheel bolts	1. Operator error (missed torque step)	Torque verification (low-cost) / Torquing template / Torque counter / DC nut runner (high-cost) / ...
		2. Torque wrench mis calibrated	Shift-based calibration / checklist / Digital reminders / ...
		3. Contaminated threads (oil/dust)	Clean threads before assembly / careful handling / ...

“One failure can have multiple causes — explore all!”

AI and Digital Tools

- * Larger orgs: AI analytics, Minitab, JMP, IoT monitoring
- * MSMEs: Excel + ChatGPT, Google Sheets AI add-ons, H2O.ai open-source

Benefit: Spot trends, predict issues, focus preventive actions

Start simple: track one critical process digitally, gradually expand.

Measuring Impact

- * Prepare an end-of-month “Quality Scorecard”
 - ❖ Outcomes achieved
 - ❖ Lessons learned
 - ❖ Follow-up actions

“Quality Month isn't just a show — it drives real improvement.”

Quick Action Tips for MSMEs

- * Track a critical process in Excel/Google Sheets, study variation
- * Ensure 100% SOP coverage; implement Partial FMEAs
- * Use visual boards to show “Before and After” results
- * Hold short weekly meetings for improvement review
- * Celebrate tiny wins — reduced defects, smoother steps, faster response
- * Use low-cost AI tools: Excel + ChatGPT, Google Sheets AI add-ons, H2O.ai open-source

Looking Ahead -

Quality Month is more than a celebration — it is an opportunity to learn, act, and see measurable improvements. By focusing on process stability, reducing variation, and using practical tools—whether simple SOPs, Partial FMEAs, or low-cost AI—every team member can contribute to better quality. Even small, consistent improvements add up to significant results over time. The real reward is a culture where quality becomes everyone's responsibility, and each person can proudly say, “I made a difference this month.”
